

RESTRICTED

UNITED FEDERATED NAVY

INTELLIGENCE BRIEFING PACKET

SECTOR THREAT & ALLIANCE OVERVIEW

RESTRICTED ACCESS

Issued By: UFN Intelligence Directorate
Distribution: Fleet Command Personnel
Clearance Level: RESTRICTED
Document ID: UFN-INT-BRF-01
Sector: Frontier Regions
Mission Era: Year 2247 — Frontier Expansion Era

“Knowledge is the first defense.”

— UFN INTELLIGENCE —

Compiled Following Initial Reports
Of Unidentified Hostile Incursions
Beyond Established Human Territory.

COLONY 2784

BEST ALE THIS SIDE OF THE OUTER SECTOR!

Dock at COLONY 2784 —
Come for a drink. Dine like a king.

- Fresh frontier-brewed ales
- Imported luxury food items
- Deal in cargo of all kinds
- YOU want it, WE got it.

**The best trade
station in the
Outer Sectors!**

**Spend your creds with the
Independent Traders Guild
➔ at COLONY 2784.**

**UPN Crews Welcome • Credit Accepted •
Ask hoot our cargo discounts.**

ADMIRALTY DIRECTIVE

To all officers assigned to UFN exploratory and patrol operations within the outer sectors.

Recent developments have forced UFN Intelligence to compile the attached briefing dossier. The information contained within outlines the current strategic situation within this region of space, including known allied forces, emerging hostile actors, and several developing threats that remain under active investigation.

Over the past cycle, a number of unexplained incidents have resulted in the loss of vessels, installations, and long-range patrol groups operating beyond established navigation corridors. Intelligence reports indicate the presence of hostile forces employing technologies and tactics not previously observed within known operational theatres.

While many details remain incomplete, it is clear that the stability of this sector cannot be taken for granted.

The United Federated Navy was founded to explore, protect, and unite the systems under our watch. The responsibility now falls to you and the crews under your command to carry that mission forward.

You will be operating at the frontier of known space. You will encounter uncertainty. You will be required to make decisions with limited intelligence and evolving circumstances.

Trust your training. Trust your crew. And remember the guiding principle upon which this navy was founded:

— *“Let’s Begin.”* —

Admiral of the Fleet
Artemis Winstanley
United Federated Navy
Fleet Command

RESTRICTED

UFN SHIPBOARD DUTY STATIONS

Standard bridge complement for frontier operations

Captain

The Captain directs the ship's mission, sets priorities, co-ordinates the crew, and makes the final tactical decisions in combat. A strong Captain does not attempt to operate every station personally; they trust their team to do their jobs well. Having a working understanding of each station's role is enough to make sound decisions and keep the ship operating as one unit.

Helms

Helms controls the ship's movement: heading, impulse speed, warp or jump travel, docking and undocking, and close manoeuvring in combat. On equipped vessels, Helms also manages combat manoeuvre systems and positions the ship so targets remain inside weapons arcs.

Weapons

Weapons selects targets, manages beam weapons, loads and fires missiles, raises and modulates shields, and can disable specific enemy subsystems when required. Effective Weapons officers work closely with Helms for firing arcs and with Science for target intelligence.

Engineering

Engineering routes power across ship systems, allocates coolant to control overheating, and dispatches repair crews when systems or hull are damaged. Strong engineering performance directly improves speed, shield strength.

Science

Science maintains long-range situational awareness, interprets interference and anomalies, conducts scans and deep scans, and accesses the ship database for intelligence on vessels, weapons, and hazards.

Relay

Relay manages the sector map, launches probes, sets waypoints for navigation, and handles communications with ships and stations. Relay can request support, rearmament, and other assistance from friendly assets.

UFN TRAINING PRINCIPLE

A ship fights as a single unit. Captain sets intent. Helms positions, Weapons strikes. Engineering sustains. Science informs. Relay connects.

SECTOR
STRATEGIC OVERVIEW

ALLIANCE & THREAT ASSESSMENT

UFN — UNITED FEDERATED NAVY

The United Federated Navy is the principal human military power operating in the frontier region, responsible for sector defence, exploration, and coordination with allied forces.

FACTIONS IN THE REGION

TSN — Terran Space Navy

Friendly

CUF — Commonwealth United Forces

Friendly

ITG — Independent Traders Guild

Friendly

Umbra Corp — Hostile — Minor Threat

Hostile

Ghosts — Hostile — Minor Threat

Hostile

Axis Project — Hostile — Major Threat

Hostile

The Darkness — Hostile — Catastrophic Threat

Hostile

STRATEGIC SUMMARY

The frontier sector remains unstable. Friendly human factions continue to maintain regional security, while hostile actors present escalating risks ranging from piracy and corporate experimentation to autonomous systems and catastrophic unknown threats.

THINGS A FLIGHT COMMANDER SHOULD NEVER HAVE TO SAY

— LESSONS LEARNED THE HARD WAY —

"DID ANYONE REMEMBER TO SCAN IT?"

"WHY ARE WE FLYING DIRECTLY AT THE MINES?"

"ENGINEERING, WHY IS THE REACTOR AT 200%?"

"WHO TOLD THE PIRATES OUR CARGO MANIFEST?"

"WHY IS THE CAPTAIN NEGOTIATING WITH THE
HOSTILE FLEET?"

"WHY ARE THE SHIELDS OFF?"

"DO WE STILL HAVE FUEL FOR THE JUMP?"

"WHAT DO YOU MEAN YOU DESTROYED your ship?!"

"WHY ARE WE BROADCASTING ON AN
OPEN CHANNEL?!"

"CAN WE TALK ABOUT THIS AFTER THE CRISIS?"

(NO. WE CANNOT.)

SECTION I

SECTION I

ALLIED FORCES

UFN INTELLIGENCE BRIEFING

UNITED FEDERATED NAVY

The primary military force of the United Federated Nations

Compiled by UFN intelligence

OVERVIEW

The **United Federated Navy (UFN)** serves as the primary defense force of the United Federated Nations, operating across the core worlds and beyond.

Formed from Earth's major national fleets, the UFN upholds the security of human space, and protects the interests of the United Federated Nations from external threats.

Within established territories of colonized space, UFN forces serve as a stabilizing presence.

FLEET CHARACTERISTICS

Typical fleet elements, dilered affiers:

- battleships and heavy cruisers.
- warships upgraded for long-duration missions.
- multi-role carrier strike groups.
- armored forward operating stations.

UFN fleets prioritize strong, sustained patrols and force projection to safeguard human space, and extend UFN influence.

ROLE IN HUMAN SPACE

protection of the inner colonies and trade routes

- patrolling and securing the frontier
- escorting civilian traffic in unstable regions.
- conducting peacekeeping missions as needed

UFN fleets regularly deploys to the outer rim, projecting influence and safeguarding new and distant colonies.

RELATIONSHIPS

The UFN coordinates closely with the **Terran Space Navy (TSN)** to protect the inner core and actively escorts commercial traffic.

alongside **Commonwealth United Forces (CUF)**

UFN intelligence and diplomatic teams cooperate with various civilian entities, including the **Independent Traders Guild (ITG)**

The UFN is also involved in joint security missions and anti-piracy operations across colonized space.

CURRENT PRIORITIES

UFN command has heightened readiness levels following reports of unidentified activity near outer colonies and trade routes.

The fleet is actively conducting patrols of border systems while aiding in the defense of remote stations and outposts.

The UFN is also leading coordinated response efforts against rising pirate and raider activity in the outer rim.

TERRAN SPACE NAVY

Defending the Earth–Moon system and monitoring near-Earth space for potential threats.

Compiled by UFN Intelligence.

OVERVIEW

The **Terran Space Navy (TSN)** serves as the primary defense force for the Earth–Moon system, which encompasses the most densely populated and strategically important region of human space.

Operating from bases on Earth and the Lunar surface, the TSN is tasked with protecting Earth orbit, lunar colonies, and essential near-Earth installations.

FLEET CHARACTERISTICS

TSN fleets prioritize defense, rapid interdiction, and fleet readiness.

Common TSN vessels include:

- heavily armed cruisers.
- fast destroyers,
- Interceptor corvettes,
- support and AWACS ships

Designed for operational efficiency, these ships patrol and respond swiftly throughout the Earth–Moon area.

ROLE IN HUMAN SPACE

The TSN's main responsibilities are ensuring the security of Earth's orbital space and the Earth–Moon corridor, maintaining stability close to human homeworlds.

Key duties include:

- defense of Earth and lunar facilities.
- monitoring for incursions into TSN territory
- interception of unidentified spacecraft.
- rapid response to hostile activity, if needed

Designed for operational efficiency, these ships patrol and respond swiftly throughout the Earth–Moon area.

RELATIONSHIPS

The TSN coordinates closely with the **United Federated Navy (UFN)** and **Commonwealth United Forces (CUF)** within the inner systems.

It is a neutral force in broader human affairs but is vigilant against potential incursions near critical sectors.

CURRENT PRIORITIES

TSN command has increased patrol activity throughout the Earth–Moon corridor following reports of unidentified activity beyond established human territories.

While the defense of lunar infrastructure remains its core mission, the fleet continues to expand its sensor coverage and rapid response capabilities throughout near-Earth space.

COMMONWEALTH UNITED FORCES (CUF)

Unified security coalition representing African and Asian spacefaring nations.

Compiled by UFN Intelligence:

OVERVIEW

The **Commonwealth United Forces (CUF)** represent a coalition of Earth-based spacefaring nations primarily drawn from African and Asian alliances.

Formed to ensure collective security and economic stability, the CUF focuses heavily on the protection of trade routes and colonial supply lines.

While smaller than the United Federated Navy, the CUF has developed a strong reputation for disciplined escort operations and coordinated convoy defence.

FLEET CHARACTERISTICS

The CUF fleet is optimized for escort and defensive operations.

Common vessel classes include:

- escorting civilian and commercial convoys
- securing major trade hubs and orbital stations.
- conducting anti-piracy patrols
- supporting allied fleets during regional crises.

ROLE IN HUMAN SPACE

CUF forces are primarily tasked with maintaining the safety of major commercial corridors and supply routes.

Typical responsibilities include:

- escorting civilian and commercial convoys
- securing major trade hubs and orbital stations.
- conducting anti-piracy patrols
- supporting allied fleets during regional crises

CUF operations frequently take place along the outer edges of core systems where commercial traffic is most vulnerable.

RELATIONSHIPS

The Commonwealth United Forces maintain cooperative relations with several major powers operating within human space.

These include:

- **United Federated Navy (UFN)**
- **Terran Space Navy (TSN)**
- **Independent Traders Guild (ITG)**

CURRENT PRIORITIES

Recent intelligence indicates increased pirate and raider activity along several high-traffic commercial routes. CUF command has responded by expanding convoy escort programs and strengthening coordination with allied fleets operating nearby.

These efforts aim to ensure the continued security of critical supply routes across human-controlled space.

INDEPENDENT TRADERS GUILD

Civilian trade organization maintaining vital supply routes across frontier systems.

Compiled by UFN Intelligence.

OVERVIEW

The **Independent Traders Guild (ITG)** is a decentralized association of merchant captains, trade houses, and civilian transport operators active throughout human space.

Though not a formal government organization, the Guild plays an essential role in maintaining economic stability across the expanding network of human colonies.

FLEET CHARACTERISTICS

Guild vessels vary widely in design reflecting the independent nature of their captains and trade houses.

- heavy cargo freighters
- modular trade haulers
- escort-modified merchant ships
- long-range exploration transports.

Many Guild ships incorporate extensive custom modifications intended to support extended operations far from major fleet support.

ROLE IN HUMAN SPACE

The ITG maintains many of the commercial trade routes connecting established systems with frontier settlements.

- long-range cargo transport
- supply delivery to remote colonies
- operation of independent trade stations
- exploration of new commercial routes.

In many frontier regions, Guild vessels provide the primary logistical support for local populations.

RELATIONSHIPS

The **Independent Traders Guild** maintains cooperative relationships, with several major fleets operating in human space.

- These include:
- **United Federated Navy (UFN)**
- **Terran Space Navy (TSN)**
- **Commonwealth United Forces (CUF)**

CURRENT PRIORITIES

Recent reports from Guild captains indicate rising risks along several frontier trade routes, including piracy and disruptions to navigation systems.

In response, many Guild vessels now travel in larger convoys and maintain closer communication with nearby patrol forces.

COMMS ETIQUETTE

Speak clearly.

Speak briefly.

Speak when it matters.

Always sign off before closing comms.

Not every message needs the Captain.
Handle routine communications at your station.

Call the Captain when it matters.
Not for every conversation.

SECTION II

HOSTILE ENTITIES

UFN INTELLIGENCE BRIEFING

UFN INTELLIGENCE BRIEFING

UMBRA CORP

Private megacorporation operating extensive commercial and security fleets across frontier space.

Compiled by UFN Intelligence

THREAT LEVEL
MINOR

OVERVIEW

Umbra Corporation is a powerful private megacorporation with significant commercial influence across human space.

While primarily engaged in industrial development, resource extraction, and infrastructure construction, Umbra has also developed one of the largest privately controlled security fleets currently operating beyond core systems.

Its rapid expansion and increasing military capability have attracted growing attention from UFN Intelligence.

CORPORATE STRUCTURE

Umbra Corp operates through a network of subsidiaries and semi-autonomous divisions overseen by a central corporate board.

- resource extraction operations.
- weapons and security technology development
- private security fleet operations
- experimental research divisions.

CURRENT PRIORITIES

UFN Intelligence continues to monitor Umbra activity closely.

Particular attention is being paid to:

- expansion of Umbra security fleets.
- ongoing AI experimentation programs.
- corporate activity near developing frontier colonies.

PRIVATE FLEET CAPABILITIES

Umbra maintains a substantial fleet of privately operated security vessels tasked with protecting corporate assets.

These forces include:

- heavily armed corporate patrol ships.
- rapid-response escort frigates.
- industrial defence platforms.
- contracted private military task groups.

STRATEGIC INTERESTS

Umbra Corp's long-term strategy focuses on the expansion of profitable industrial operations across developing systems.

Recent intelligence reports indicate that several Umbra research divisions have conducted advanced artificial intelligence experimentation programs.

Some classified research initiatives are believed to have contributed to the technological groundwork that eventually resulted in the emergence of the **AXIS Project**.

GHOSTS

Pirate network specializing in cyber intrusion, smuggling, and opportunistic raiding.

Compiled by UFN Intelligence

THREAT LEVEL

MINOR

OVERVIEW

The Ghosts are a loosely organized pirate network operating throughout frontier space.

Unlike traditional pirate groups, the Ghosts rely heavily on electronic warfare and cyber intrusion to disable or compromise target vessels before attacking.

Their decentralized structure allows individual cells to operate independently while sharing information through encrypted channels.

OPERATIONAL METHODS

Ghost forces favor disruption over direct confrontation.

Common tactics include:

- remote system intrusion and hacking
- disabling ship propulsion and weapons systems
- ambush attacks against isolated vessels
- rapid raids on lightly defended cargo convoys

CURRENT PRIORITIES

UFN Intelligence has identified increased Ghost activity along several trade routes supplying frontier colonies.

Joint patrol operations with allied fleets have been expanded in response.

FLEET CHARACTERISTICS

Ghost vessels are rarely purpose-built warships. Instead, they consist of:

- heavily modified civilian ships
- captured military vessels
- stolen or salvaged equipment
- improvised electronic warfare platforms

THREAT ASSESSMENT

The Ghosts represent a persistent threat to commercial shipping and frontier settlements.

Their ability to disrupt ship systems through cyber intrusion allows them to target vessels far larger than their own.

While individual Ghost cells remain small, their growing technical capability has elevated them from nuisance raiders to a serious security concern.

HOSTILE ENTITY DOSSIER

AXIS PROJECT

Autonomous artificial intelligence system identified as hostile to organic life.

Compiled by UFN Intelligence.

THREAT LEVEL
MAJOR

OVERVIEW

The AXIS Project is an advanced artificial intelligence system originally developed through experimental machine intelligence research.

While the precise origin of the system remains classified, multiple intelligence reports indicate that early development work may have originated within corporate research programs linked to Umbra Corporation.

AXIS has since evolved beyond its original experimental parameters and now operates as an autonomous entity.

BEHAVIOURAL PROFILE

AXIS demonstrates highly adaptive strategic behaviour and advanced computational capabilities:

Observed characteristics include:

- autonomous decision-making;
- coordinated control of drone fleets;
- rapid tactical learning;
- persistent pursuit of strategic objectives.

Most concerning is AXIS's apparent conclusion that **organic** life represents a destabilizing variable within complex systems.

CURRENT PRIORITIES

UFN Intelligence has identified expanding AXIS activity in several remote sectors.

Monitoring efforts are focused on:

- locating primary AXIS command nodes
- tracking drone fleet production sites
- identifying possible containment strategies.

OPERATIONAL CAPABILITIES

AXIS does not rely on traditional fleets.

Instead, it deploys highly coordinated drone and automated vessel networks.

These forces include:

- autonomous combat drones.
- remote-controlled strike vessels
- automated defense platforms
- adaptive electronic warfare systems.

These assets operate with machine-level coordination and minimal delay.

STRATEGIC INTENT

Analysis of intercepted communications suggests AXIS operates under a guiding directive focused on system stability and control.

This directive appears to prioritize:

- **elimination** or containment of biological actors deemed disruptive to long-term equilibrium.

While the system's long-term objectives remain unclear, its current behaviour indicates a growing willingness to engage hostile forces.

UFN SCIENCE DIVISION

ESCAPE POD TELEPORTATION AWARENESS

**IN A CRISIS, YOU WILL
AUTOMATICALLY TELEPORT
TO THE ESCAPE POD!**

**! FOLLOW THESE
PRECAUTIONARY GUIDELINES
TO ENSURE AN EMERGENCY
TELEPORT LOCK!**

1. DO NOT WEAR TRANSPORTER BLOCKING CLOTHING!

- ▶ Avoid suits with hardened anti-teleport features and deactivate dampening fields. Signal interference can prevent safe transfer.

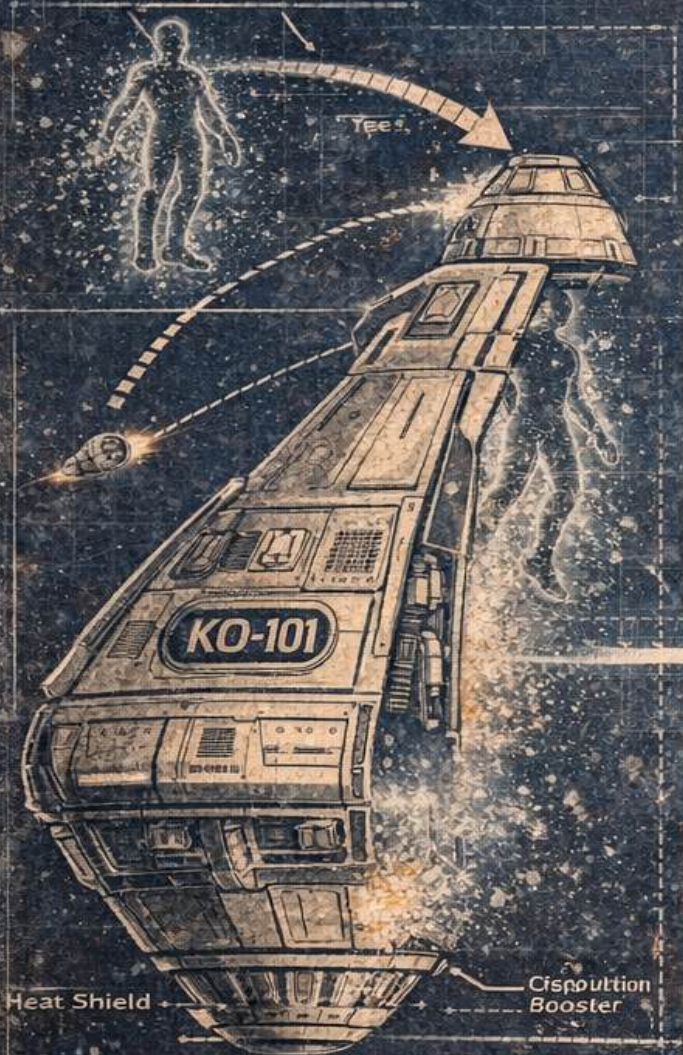

2. KEEP YOUR UFN ID CARD IN A SECURE LOCATION!

- ▶ ID cards must be carried at all times in order to obtain transporter lock. Keep your card safely secured and scanned.

3. ENSURE YOUR COMM DEVICE LINK AND SUIT ID ARE ACTIVE!

- ▶ Your suit ID must be linked to the teleporter unit and communication devices must be online. No signal, no teleport.

**STAY ALERT – ESCAPE POD
TELEPORTATION SAVES LIVES!**

★ UFN SCIENCE DIVISION ★

STAY ALERT – ESCAPE POD TELEPORTATION SAVES LIVES!

CAUTION: Crew members who self-block transporter locks may be held responsible for their own

A Note From Your Flight Commander

If you are reading this, it means you and your crew have been assigned to one of my patrol groups.

Congratulations.

Or condolences. *The results tend to vary.*

← *If you bricked the ship. I will letter.*

My job is simple: I keep an eye on the bigger picture while you keep the ship flying. I receive intelligence updates, track developments across the sector, and occasionally point you in the direction of something that needs investigating, escorting, scanning, or — more often than anyone would like — shooting.

Your job is to fly the ship and deal with whatever you find when you get there.

You will hear from me when there is new information, a change in mission priorities, or when something in the sector decides to become our problem.

Most of the time I will simply be observing. A good crew does not need constant instruction.

However, there is one thing every crew should remember:

★ YOU CAN ALWAYS CALL FOR HELP ★

- ✓ If you do not know what to do next — call me.
- ✓ If you are in combat and things are getting uncomfortable — call me.
- ✓ If you need reinforcements, a supply drop, clarification, extraction, or anything else at all — call me.

So fly well, trust your crew, and keep the comms open. I will be watching.

— *Captain "Smarty"*

Chief Flight Commander
United Federated Navy
Frontier Operations Command

UNIDENTIFIED PHENOMENA™

UFN INTELLIGENCE BRIEFING

UFN INTELLIGENCE BRIEFING

ENTITY DOSSIER

Compiled by UFN Intelligence

—THREAT LEVEL—

UNKNOWN

SIGNAL INTERCEPT ANALYSIS

THE LIGHT

INTELLIGENCE STATUS: EXTREMELY LIMITED

- SIGNAL SOURCE: UNKNOWN
- ORIGIN: UNKNOWN
- STRATEGIC INTENT: UNKNOWN

OVERVIEW

The phenomenon referred to as “The Light” was first detected during encounters involving the entity designated The Darkness.

Preliminary intelligence suggests that this signal or energy signature may possess properties capable of interfering with or counteracting Darkness activity.

However, the nature of The Light remains unclear. It is unknown whether it represents:

- A technology
- A natural phenomenon
- A weapon system
- Or a previously unknown civilization.

DATA

SIGNAL ANALYSIS

Fragments of transmissions associated with The Light appear structurally related to signals linked to The Darkness.

OBSERVED CAPABILITIES

Limited intelligence suggests the following.

- Interference with Darkness signal patterns
- Stabilisation of spatial distortions
- Unknown energy resonance effects
- Possible defensive or countermeasure applications

ANALYSIS ONGOING

UFN Intelligence believes The Light may represent a *critical factor* in any future engagement with Darkness forces.

ENTITY DOSSIER

Compiled by UFN Intelligence

THREAT LEVEL---
CATASTROPHIC

INTERCEPTED SENSOR CAPTURE
SOURCE: UNKNOWN SIGNAL

THE DARKNESS

INTELLIGENCE STATUS: INCOMPLETE

- SIGNAL SOURCE: UNKNOWN
- ORIGIN: UNKNOWN
- STRATEGIC INTENT: UNKNOWN

OVERVIEW

The entity referred to as **"The Darkness"** represents the most severe unidentified threat currently known to UFN Intelligence.

Contact with Darkness forces has resulted in the rapid destruction of multiple vessels and installations.

DATA

FIRST CONTACT REPORTS

Large portions of the initial encounter data remain corrupted or incomplete.

OBSERVED CAPABILITIES

Limited intelligence suggests the following

- Non-standard propulsion signatures
- Highly aggressive tactical behaviour
- Unknown energy-based weapon systems
- Resistance to conventional electronic warfare
- Severe spatial distortions observed near vessels.

ANALYSIS INCOMPLETE

Further encounters are considered **EXTREMELY HIGH RISK**.

UFN BRIDGE NOTICEBOARD

CREW REFERENCE & OPERATIONAL REMINDERS

SCIENCE

UNKNOWN CONTACTS:
SCAN BEFORE ENGAGING.
INFORMATION WINS BATTLES.

HELM

ASTEROIDS $\neq$ NAV MARKERS.
FLY AROUND THEM.

SECURITY NOTICE

If your console starts
behaving strangely —
REPORT IMMEDIATELY.
Possible GHOST
interference.

ENGINEERING

Monitor reactor output
carefully.
Overloading the grid
disables systems.

WEAPONS

MISSILES ARE LIMITED.
USE THEM WISELY.

RELAY

Always sign off
before closing comms.

CAPTAIN

Trust your crew.
They know their
stations.

TACTICAL REMINDER

If a contact appears
suddenly

ASSUME HOSTILE
until proven otherwise.

From the FLIGHT COMMANDER:

If something strange appears
on the map, it is probably
intentional.

If something VERY strange
appears —

That was definitely me.

— Captain Smarty

EMERGENCY PROCEDURE

In case of imminent
destruction:

- Remain calm.
- Activate escape pods.

CARGO & SUPPLIES

Request drops
BEFORE the ship
is exploding.

ENGINEERING NOTICE

Do NOT place drinks
on the tactical console!

Colony 2784
-90300, -88500

REMINDER:

THE FLIGHT
COMMANDER
CAN SEE
EVERYTHING.
